# Welcome to Miele

IMMER BESSER (Forever Better) – our pledge

When our two great grandfathers were in the process of founding the Miele company, they had to make sure they stood apart from the competition in order to be successful. There are effectively only two ways of doing this: either by being cheaper than the rest or by being better than the rest. It is not really possible to be both at the same time.

They decided to be "better" than the rest

Numerous best-in-class awards and certificates attest to the fact that Miele has continued to renew its commitment to being "immer besser" throughout the past 115 years. However, the millions of satisfied customers around the world are perhaps the most important endorsement.

At the heart of this success lies a continuity of values and goals which are typically only found in companies that have been family-run for generations, rather than in businesses which are guided by the often short-term interests of the stock market.

It is in this sense that Miele has embodied first-class product quality and German engineering since 1899. Miele also stands in equal measure for respect, fairness and mutual esteem towards sales partners, customers, suppliers, employees and neighbours. Buying a Miele is an environmentally-friendly decision. We ensure this by using methods of production that save resources and by manufacturing products which set new standards in terms of their consumption of electricity, water and detergent – and save you money at the same time.\*

As directors and co-proprietors of the fourth generation of our business, we promise you that this will not change.

*Markus Miele Reinhard Zinkann*

# Immer Besser (Forever Better)

## Our Brand Promise

### **There are many good reasons for choosing Miele.**

Since the company was founded in 1899, Miele has remained true to its "Immer Besser" (Forever Better) brand promise. This means that we will do all that we can to be "Immer Besser (Forever Better) than our competitors and "Immer Besser" (Forever Better) than we already are. For our customers this means the peace of mind of knowing that choosing Miele is a good decision – and probably the decision of a lifetime!

### **Miele Quality**

Over the last 100 years, Miele has successfully earned the trust of consumers around the globe. Miele is the only manufacturer in the industry to test products such as our washing machines, tumble dryers, dishwashers and ovens to the equivalent of 20 years of use. Once a Miele, always a Miele. Miele customers around the world remain loyal to Miele and recommend Miele to others. Looking to the future, we promise not to entertain any compromises when it comes to the dependability and durability of our appliances.

### Miele Technology

Miele believes in achieving the best results while using the least amount of energy possible. This simple principle applies to all Miele categories - whether cooking or cleaning. The key is a wealth of innovative features that yield the best results and support low energy consumption. As a world-wide technology leader, achieving top scores in both performance and efficiency tests, Miele is always looking towards the future needs of tomorrow's consumer.

### Miele Convenience

Whether conventional rotary switch, discreet sensor controls or a high-resolution touch display like the one on your smart phone, operating a Miele is both easy and fun. Add to this a multitude of convenient and reliable automatic programs in both laundry and kitchen appliances. Make life easier for yourself with Miele!

### Miele Design

Clean lines and a European-inspired look define Miele appliances, creating a timeless and elegant design. Nowhere else will you find such a comparable range of matching built-in kitchen appliances that suit even the most diverse interior designs. Great care was taken by the Miele design team to coordinate appliance design across the entire product range, making Miele appliances the perfect choice for any home.

### Miele Service

Since 1899, Miele has been dedicated to creating extraordinary products that live up to our mantra, "Immer Besser" - a German phrase meaning "Forever Better". With ForeverCare, we've applied this same philosophy to our customer care practices. But ForeverCare is more than just a concept - it's a guarantee. A guarantee that our commitment to you will extend far beyond the point of purchase. Rather, we'll provide unparalleled service throughout the very long life of your machine. From payment, to delivery, to installation, to service we'll make sure your needs are always well taken care of.

### The Miele Brand

In many countries, Miele is the most coveted brand in its industry. In its home market in Germany, Miele was even voted "Best Brand Ever" in 2013 across all product categories. Miele customers have high expectations for the performance and the environmental friendliness of their household appliances. This is a reflection of the standard of excellence that Miele holds itself to. People who choose Miele care about quality and are design-conscious.

# Miele Cooktop Options

## Combined With An Oven

The Miele H2260 E + KM6002 is a 24" electric cooktop and convection oven combination that offers a clean cooktop surface free of controls. The cooktop is operated via controls on the oven's fascia panel via a built-in wired connection. This 24" combination is a great option for condos or small kitchen layouts.

## Built-In Cooktops

Built-in cooktops, either electric or induction, are a sleek design solution for any kitchen. Easily combined with Miele built-in ovens and lifestyle products, Miele built-in cooktops allow for complete versatility in harmonious kitchen design.

# Miele Cooktop Types

Well thought-out ergonomic designs with intuitive controls are standard on all Miele cooktops. Miele induction and electric cooktops feature smooth and easy-to-clean surfaces, innovative features and sleek design for powerful performance in any kitchen.

## Induction

The Miele induction cooktops offer a distinctive, non-contact method of heating using magnetic fields to transfer energy directly to cookware. The induction element stays cool, while the target object heats rapidly for extremely efficient heating. Miele induction cooktops offer the benefits of a gas flame, including rapid heat-up and cool down, without the concerns of gas and other types of electric heating.

## Electric

Miele electric cooktops provide exceptional performance and the flexibility to accommodate any kitchen design. Our Ceran surfaces are designed to resist heat transfer, allowing areas outside the rings to stay cool to the touch. All Miele cooktops also feature a surface that is lower than the frame to capture any liquids if a pot boils over. The sealed surface and controls also make clean-up an easy task.

# Miele Cooktop Sizes

Choose the right size cooktop for your kitchen design and cooking needs - choose between a variety of induction and electric cooktop sizes from Miele.

24" wide space-saving cooktop with 3 to 4 cooking zones.

30 - 32" wide cooktop with 4 cooking zones.

36 - 42" wide cooktop with 4 to 5 cooking zones

🔒

The image shows a close-up of the control panel for a Miele induction cooktop. The panel is dark grey with a silver trim at the bottom. The brand name 'Miele' and 'INDUCTION' are printed in white. The control area features a digital display with red LED numbers showing '00:40'. Above the display are several icons: a power symbol (III/▶), a clock (⌚), and a lock (🔒). Below the display is a row of numbers from 0 to 9. To the right of the numbers are two additional icons: 'B I/II' and a lock symbol. A stainless steel pot with a lid is visible in the upper right corner of the frame.

# Miele Intuitive User Controls

Nothing should stand in the way of cooking. That is why Miele cooktops are intuitive to operate and offer a variety of innovative features. Controls including Direct Select Plus, DirectSelection and knob controls make cooking fun and easy.

## DirectSelection

Cooking zones are controlled with a central numerical keybank. Power levels and times can be selected directly, quickly and intuitively. Setting the timer is extremely easy.

**Exclusive to Miele**

## Direct Select Plus

Each cooking zone features its own dedicated set of linear back-lit numerical sensor touch controls for intuitive rapid selection of power settings and cooking durations so you don't even have to pre-select the cooking zone.

## Touch Control

Turn the cooktop on and off, control the power level, and activate the timer at the touch of a button.

## Knob Controls

You can select power settings quickly and intuitively using rotary controls. There is a separate control for each cooking zone, which is very easy to use.

## HiLight Heat Elements

HiLight heater elements create radiant heat with rapid heat-up of approximately three seconds which means that the cooktop is immediately ready for use. The design of the HiLight heater filaments ensures a very even distribution of heat.

# Fast and Powerful Cooking

Miele cooktops not only provide maximum convenience and safety, they are also equipped with innovative technology such as HiLight heating elements on electric cooktops and the exceptionally fast Booster Functions and PowerFlex on induction cooktops. Regardless of the type of cooking you prefer, induction and electric cooktops allow you to achieve perfect cooking results quickly.

## HiLight heat elements

HiLight heater elements create radiant heat with rapid heat-up of approximately three seconds which means that the cooktop is immediately ready for use. The design of the HiLight heater filaments ensures a very even distribution of heat.

## **Exclusive to Miele** Booster Function

Miele induction cooktops each have a Booster function, which when selected maximizes the output on a given induction element for a short period of time. This reduces the time needed to bring water to a boil, for example.

## TwinBooster

Concentrated power for faster cooking! TwinBooster makes cooking more flexible because induction power can be distributed individually, allowing you to combine power of two cooking zones into one when it's needed.

## **Exclusive to Miele** PowerFlex

PowerFlex technology allows you to combine two cooking zones into one - perfect for particularly large pans or where extra power is required.

\*As per January 2015

\*\*Compared with a 15 year old Miele electric cooktop

**Miele**  
INDUCTION

0 1 2 3 4 5 6 7 8 9 0

0 1 2 3 4 5 6 7 8 9

# Flexible Cooking Zones

Miele cooktops offer cooking and extended zones in various shapes and sizes. Discover PowerFlex on Miele induction cooktops or the dual-circuit zones on electric cooktops. Use these special features to place pans and oven dishes of various sizes on your cooktop.

## PowerFlex

PowerFlex zones are particularly versatile and flexible. PowerFlex technology allows you to combine two cooking zones into one - perfect for particularly large pans or where extra power is required.

# Product Features

## **Exclusive to Miele** Con@ctivity 2.0

You can concentrate entirely on cooking thanks to innovative automatic Con@ctivity 2.0. Besides switching the ventilation hood on and off, Con@ctivity 2.0 automatically adjusts the hood's suction power according to heat generated from the cooktop below. The automatic Con@ctivity 2.0 function enables the ventilation hood to communicate with the cooktop using RF technology.

## **Exclusive to Miele** Direct Select Plus

Each cooking zone features its own dedicated set of linear back-lit numerical sensor touch controls for intuitive rapid selection of power settings and cooking durations so you don't even have to pre-select the cooking zone.

## PowerFlex

PowerFlex technology allows you to combine two cooking zones into one - perfect for particularly large pans or where extra power is required.

## **Exclusive to Miele** ExtraSpeed

Up to 35% time savings\*. This exclusive Miele technology frees up more valuable time for you.

## Versatile Cooking Zone Designs

Perfect for all types of cookware and a wide variety of pans.

## Timer

You can set a duration for a cooking zone, after which it will switch off automatically, or even use the minute minder independently of cooktop functions.

\* Compared with a 15 year old Miele electric cooktop

# Miele Electric and Induction Cooktop Product Highlights

## Stop & Go

A cooking zone can be turned to power setting 1 at the touch of a button, allowing you to leave the cooktop unattended for a short while.

## Auto Heat

This function gives an initial power boost before reducing power to prevent burning.

## Individual Settings

Basic cooktop settings can be adapted to suit personal preferences.

## Keeping Warm Function

Food is kept at the exact serving temperature without sticking to the pan, leaving you free to concentrate on other dishes.

## Easy-to-Clean Ceramic Glass

Because the cooktop surface remains relatively cool, soiling can be removed easily.

## Efficient and Safe

Because induction technology generates heat only in the base of the pan, no heat is lost and the ceramic glass stays cool.

## Pot Size Recognition (Induction Only)

The size of the pan is recognized by the cooktop and energy supplied to this area only.

## Automatic Switch Off

If there is no pan on a cooking zone when the cooktop is switched on, or the pan is unsuitable, the power supply will not turn on.

## Residual Heat Indicator

An indicator for each zone shows whether it is still hot to touch and thus ensures optimum operational safety to protect from injury and burns.

### **Safety Switch Off**

If a cooking zone is left on over an unusually long period of time, it will automatically switch itself off.

### **Program and System Lock**

Both functions prevent accidental or unauthorized switching on of the cooktop.

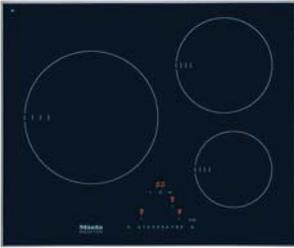

### **Overheating Protection/Fault Monitoring**

The cooktop switches off automatically in case of extreme heat.

<b>Miele Advantage Plus</b>	<b>\$4,769.00</b>

# Useful Information

## Miele Cooktops - Glossary

### Auto Heat

The Auto Heat function gives an initial boost to the normal power output for faster boiling and then reduces the power automatically for continued cooking, so you don't have to worry about turning it down at the right time, avoiding food burning and also saving energy.

### Automatic Switch Off

If there is no pan on a cooking zone when the cooktop is switched on, or the pan is unsuitable, the power supply will not turn on.

### Con@ctivity 2.0

Besides switching the ventilation hood on and off, Con@ctivity 2.0 automatically adjusts the hood's suction power according to heat generated from the cooktop below. The automatic Con@ctivity 2.0 function enables the ventilation hood to communicate with the cooktop using RF technology.

### Direct Select Plus

Each cooking zone features its own dedicated set of linear back-lit numerical sensor touch controls for intuitive rapid selection of power settings and cooking durations so you don't even have to pre-select the cooking zone.

### Easy-to-clean Ceramic Glass

Ceramic glass is very easy to clean. Splatters and other types of soiling are easy to remove thanks to the smooth surface. It is particularly easy with induction cooktops as the surface remains relatively cool.

### ExtraSpeed

Miele electric cooktops with ExtraSpeed are the fastest electric cooktops in the world\*. Thanks to innovative three-component technology exclusive to Miele, heating up with Miele ExtraSpeed saves you up to 35% of time\*. This is achieved through intelligent timing of heater elements, a higher heater rating and efficient temperature control.

### Individual Settings

Basic cooktop settings can be easily adapted to individual needs. For example, the response speed of the sensors can be changed.

### Keeping Warm Function

This function allows you to keep food warm, irrespective of amount. By intelligent monitoring of the temperature of the pan base, food is kept at the exact serving temperature without sticking to the pan, leaving you free to concentrate on the other dishes.

### Overheating Protection and Fault Monitoring

Every cooking zone is equipped with overheating protection. This automatically switches off the heating element of the cooking zone in the case of extreme use before the ceramic glass or other components can overheat. If liquid or another item gets onto the surface by mistake, the cooktop automatically switches off as well.

### Pot Size Recognition

Thanks to Miele pot size recognition, Miele Induction cooktops are extremely safe. Within the cooking zone footprint, the size of the pan is recognized and energy is only supplied to this area. Heat is only generated where you need it - in the base of the pot.

### Program and System Lock

By touching the padlock sensor, the functions and power settings are locked to protect against tampering, e.g. by children, and thus an unwanted change of power which could result in a spoiled dish. Alternatively, the cooktop can be disabled altogether to prevent the cooktop being used unintentionally or unauthorized, e.g. by children.

### PowerFlex

PowerFlex technology allows you to combine two cooking zones into one - perfect for particularly large pans or where extra power is required.

### Residual heat indicator

An indicator for each zone shows whether it is still hot to touch and thus ensures optimum operational safety to protect from injury and burns.

### Safety and system lock

The lock function prevents unwanted adjustments to the selected power levels during cooking. The system lock protects from accidental or unauthorized switching on, by children, for example. This function can be activated on a cooktop that is switched off.

**Safety Switch Off**

A maximum operating duration is defined for each power stage. If a cooking zone is operated for an unusually long time at the same power level, it automatically switches off.

**Stop & Go**

With the Stop&Go function, all cooking zones can be reduced to power level 1 at the touch of a single button, allowing you to leave the cooktop unattended for a short time without something burning or boiling over. When you return to the cooktop, the previously set power levels can be reactivated with another touch of a button.

**Timer**

The cooktop timer helps you to take some of the stress out of cooking. You can, for example, set a duration for a cooking zone, after which it will switch off automatically, or even use the timer independently of cooktop functions.

**TwinBooster**

Concentrated power for faster cooking! TwinBooster makes cooking more flexible because induction power can be distributed individually, allowing you to combine power of two cooking zones into one when it's needed

**Versatile Cooking Zone Designs**

Miele cooktops offer cooking zones and burners in different shapes and sizes. This allows you to use pans of every shape and size on the cooktop.

# Miele ForeverCare

## Delivery, Installation, Customer Service

### Miele ForeverCare

With Miele ForeverCare, you get a guarantee. A guarantee that our commitment to you extends far beyond the point of purchase. Rather, we'll provide unparalleled service throughout the very long life of your machine. We are confident in offering you exceptional customer service.

#### Visit The Miele Experience Centres

Miele Experience Centres are open to the public to provide the complete Miele experience and are located in four cities across Canada: Montreal, Toronto, Calgary, and Vancouver.

EMAIL:

customercare@miele.ca

HAVE QUESTIONS?

Please ask your Miele Chartered Agent for more information or go to [miele.ca](http://miele.ca)

### What is Miele ForeverCare?

Miele provides unique advantages to our customers with a combination of features unparalleled in the appliance category, namely:

#### Manufacturer-Direct Service

If you ever have a problem with your Miele machine, our own Miele Factory Service Technicians will take care of it. Most problems can be solved on the first visit, as we know the exact model you have and carry the genuine Miele parts you will need.

#### Extended Warranty from the Manufacturer

We want you to enjoy a long and trouble-free experience with our machines. In addition to the standard warranty, we have Miele Extended warranty. This direct offer from Miele allows you to increase your hassle-free coverage up to 10 years. The extended warranty relationship remains strictly with Miele, so you can deal directly and exclusively with us if you have any issues.

#### Miele Custom Plans

The chart below illustrates how you can upgrade the benefits of ForeverCare.

#### Manufacturer Delivery and Installation

We want your machine to work perfectly from the first time you use it. So, we offer delivery and installation in your home ourselves, with our Miele-dedicated service team. Installation can be organized within 48 hours of ordering through the Miele Customer Care Centre, and your delivery is tracked with GPS so we can provide you with a near exact time of delivery.

#### Miele CareCollection

To ensure you make the most of your Miele appliance, we've created a range of everyday and specialty products available for purchase. From laundry detergent to dishwasher tablets and a variety of cooking accessories, these products are designed specifically for your appliance, ensuring better results and a longer, hassle-free lifespan.
