As Individual as Your Taste

Technology Meets Style

Miele Built-In TopControl Microwave

Miele microwave ovens, with controls positioned at the top, offer excellent user benefits. The TopControl design allows for a harmonious look when installed in combination with any other Miele appliance from any Miele design line. The glass door opens downwards—similar to the ovens. With the controls positioned conveniently at the top, more space is available in the interior cavity.

Miele Built-In SideControl Microwave

As an alternative to a TopControl microwave, the SideControl microwave offers the classic user interface with a left-hinged door. Built-in SideControl appliances can be combined with other Miele built-in appliances or installed on their own.

The technology and style of your kitchen appliances should be as individual as your tastes. Miele microwave ovens offer a variety of design options and functionalities to suit your practical and design requirements.
