Welcome to Miele

IMMER BESSER (forever better) – our pledge

When our two great grandfathers founded the Miele company, they had to make sure they stood apart from the competition in order to be successful. There are effectively only two ways of doing this: either by being cheaper than the rest or by being better than the rest. It is not really possible to be both at the same time.

They decided to be "better" than the rest.

Numerous best in class awards and certificates attest to the fact that Miele has continued to renew its commitment to being "Immer Besser" (Forever better) throughout the past 115 years. However, the millions of satisfied customers around the world are perhaps the most important endorsement.

At the heart of this success lies a continuity of values and goals which are typically only found in companies which have been family-run for generations, rather than in businesses which are guided by the often short-term interests of the stock market.

It is in this sense that Miele has embodied first-class product quality and German engineering since 1899. Miele also stands in equal measure for respect, fairness and mutual esteem towards sales partners, customers, suppliers, employees and neighbours. Buying a Miele is an environmentally friendly decision. We ensure this by using methods of production that save resources as well by producing products which set new standards in terms of their consumption of electricity, water and detergent – and save you money at the same time.*

As directors and co-proprietors of the fourth generation of our business we promise you that this will not change.

Dr. Markus Miele

Dr. Reinhard Zinkann

* Please visit www.miele-sustainability.com for more information on our efforts and guiding principles

Immer Besser (Forever Better)

Our Brand Promise

There are Many Good Reasons for Choosing Miele.

Since the company was founded in 1899, Miele has remained true to its "Immer Besser" (Forever Better) brand promise. This means that we will do all that we can to be "Immer Besser (Forever Better) than our competitors and "Immer Besser" (Forever Better) than we already are. For our customers this means the peace of mind of knowing that choosing Miele is a good decision – and probably the decision of a lifetime!

Miele Quality

Over the last 100 years, Miele has successfully earned the trust of consumers around the globe. Miele is the only manufacturer in the industry to test products such as our washing machines, tumble dryers, dishwashers and ovens to the equivalent of 20 years of use. Once a Miele, always a Miele. Miele customers around the world remain loyal to Miele and recommend Miele to others. Looking to the future, we promise not to entertain any compromises when it comes to the dependability and durability of our appliances.

Miele Technology

Miele believes in achieving the best results while using the least amount of energy possible. This simple principle applies to all Miele categories - whether cooking or cleaning. The key is a wealth of innovative features that yield the best results and support low energy consumption. As a world-wide technology leader, achieving top scores in both performance and efficiency tests, Miele is always looking towards the future needs of tomorrow's consumer.

Miele Convenience

Whether conventional rotary switch, discreet sensor controls or a high-resolution touch display like the one on your smart phone, operating a Miele is both easy and fun. Add to this a multitude of convenient and reliable automatic programs in both laundry and kitchen appliances. Make life easier for yourself with Miele!

Miele Design

Clean lines and a European-inspired look define Miele appliances, creating a timeless and elegant design. Nowhere else will you find such a comparable range of matching built-in kitchen appliances that suit even the most diverse interior designs. Great care was taken by the Miele design team to coordinate appliance design across the entire product range, making Miele appliances the perfect choice for any home.

Miele Service

Since 1899, Miele has been dedicated to creating extraordinary products that live up to our mantra, "Immer Besser" - a German phrase meaning "Forever Better". With ForeverCare, we've applied this same philosophy to our customer care practices. But ForeverCare is more than just a concept – it's a guarantee. A guarantee that our commitment to you will extend far beyond the point of purchase. Rather, we'll provide unparalleled service throughout the very long life of your machine. From payment, to delivery, to installation, to service we'll make sure your needs are always well taken care of.

The Miele Brand

In many countries, Miele is the most coveted brand in its industry. In its home market in Germany, Miele was even voted "Best Brand Ever" in 2013 across all product categories. Miele customers have high expectations for the performance and the environmental friendliness of their household appliances. This is a reflection of the standard of excellence that Miele holds itself to. People who choose Miele care about quality and are design-conscious.

Miele Ventilation Hood Types

Whether modern, classic or extraordinary, Miele offers a wide spectrum of the most modern ventilation hoods. No matter which Miele ventilation hood you choose, enjoy intuitive operation, reliable functions and outstanding quality right down to the very last detail.

All Miele ventilation hoods are developed in the Miele Arnsberg plant in Germany. Each one is unique - every stage of the manufacturing process involves a certain amount of manual craftsmanship, from shaping the steel to welding and polishing.

Make a clear statement with minimalist design in stainless steel or a combination of stainless steel and glass. There is even a choice of a bowed or flat glass canopy. Miele ventilation hoods boast clean, prominent lines and outstanding workmanship. Whether installed on a wall or over an island, these ventilation hoods always attract attention.

Ventilation hoods from Miele are a highlight in every kitchen in terms of functionality and design.

Wall Hoods

Choose a design-forward wall hood to complement the timeless look of your Miele built-in cooking appliances. Whether you prefer your wall hood to be solo mounted on the wall, or whether you prefer adjacent cabinetry, Miele hoods complement your personal design, taste and flair.

Island Hoods

Make a bold statement with a beautiful Miele island hood. Miele carries a variety of sleek and design-forward models as a great central feature in any kitchen.

Downdraft Systems

Building Miele downdraft systems into a countertop frees up space in the kitchen. Room heights and other obstructions are no longer an issue. At the touch of a button, the downdraft extractor is raised and activated to extract cooking vapours and odours. When the hood is no longer needed, it simply disappears into the countertop. In terms of form and function, this appliance is a highlight amongst ventilation hoods and can be installed in any kitchen.

Miele Ventilation Hood Designs

Built-In Hoods

Miele built-in hoods allow for a completely different installation altogether - providing additional design flexibility. Choose the built-in hood design that best suits your cabinetry style and kitchen design.

Built In Hood Types

Choose a 'built-under' hood for a floating effect with a pronounced stainless steel frame. This is a sleek option for under-cabinet installation, where venting can be easily concealed in the upper cabinet.

Select Miele 'tilt-out' hood to fully integrate into your upper cabinet design. By simply pulling the upper cabinet upwards, the hood is activated and cooking can begin! Easily folds away and is fully concealed when not in use.

A 'telescopic visor' or 'pull-out' hood also is easily fully hidden from sight. By pulling the front visor forwards, the hood becomes visible and can be used. These hoods are perfect for those that want uninterrupted design lines in their upper cabinets.

Miele 'fully-integrated' hoods are not visible from the front and are usually housed in a decorative custom cabinetry housing. They are a perfect solution for a featured canopy hood.

Miele Ventilation Hood Operating Modes

When cooking, and particularly when frying, vapours are released which consist of a mixture of steam, particles of fat and odours. If air in the room is not extracted or filtered, these vapours will remain in the room and affect the kitchen environment. Over a period of time this will affect the kitchen cabinetry, furnishings, paint etc. as this is where grease and vapours settle. Two installation options are available for effective cleaning of the air: vented installation and recirculated installation.

Vented Installation

Vented hoods draw the cooking vapours in and remove grease particles with the help of the grease filter. The filtered air is then transported out of the kitchen via vent ducting and any excess moisture and odours are removed from the kitchen. To do this, vented hoods need ducting that vents the air outside via a wall or roof vent.

Vented hoods are particularly recommended above gas cooktops as well as for frequent deep-frying, grilling or use of the wok. This type of cooking generates a lot of heat, grease and steam which these ventilation hoods removes most efficiently.

Recirculated Installation

Recirculation hoods draw in steam and vapours and remove grease and odours through various filters. The air circulation takes place within the room, therefore recirculation ventilation hoods need neither vent ducting nor wall or room vents.

This type of hood is very easy to install and is often the only option available because of building constraints, e.g. in a condo building. A recirculation ventilation hood is a good choice for installation above an electric cooktop. Over a gas cooktop, however, where lots of heat is created, a vented hood should be installed if possible.

Motorized Miele Ventilation Hoods

Miele ventilation hoods are designed for people who like something a little out of the ordinary. With these exclusive motorized ventilation hoods, the body of the ventilation hood automatically moves into the perfect position for operation and back into its park position when switched off to save space. The very best in ergonomics, highly efficient extraction and perfect integration in the kitchen - the epitome of Miele technology.

DA 6881 and DA 6891

In terms of form and function, this appliance is a highlight amongst ventilation hoods and can be built into any kitchen. At the touch of a button, the downdraft is raised and activated to extract cooking vapours and odours straight from cooktop. When the hood is no longer needed, it simply disappears into the countertop again at the light touch of a button.

DA 424 V-6 Varia

The Miele height-adjustable "Varia" ventilation hood solves an age-old problem: Install the hood too high and it will not extract vapours properly; install it too low and your view of the cooktop workstation is obstructed.

A "Varia" hood from Miele glides up and down by up to 12" at the push of a button. This allows the ventilation hood to be set to the ergonomically-ideal height for any user.

Con@ctivity 2.0

Product Features

**Exclusive
to Miele**

Con@ctivity 2.0

Achieving optimum extraction of cooking vapours and odours while also saving energy, select Miele hoods are equipped with Con@ctivity 2.0. Miele Con@ctivity 2.0 enables the ventilation hood to communicate with the cooktop. Your Miele ventilation hood uses the data from the cooktop to automatically turn itself on - and then selects the correct fan setting to ensure the optimum room microclimate at all times. You don't even have to remember to switch off the appliance. With the automatic run-on control, the hood will switch itself off automatically after you have finished cooking so you do not use any more energy than is necessary.

Alternatively, manual operation is possible.

Silence

Silent and efficient, the motor is effectively insulated with special soundproofing mats.

10- Layer Stainless Steel Grease Filters

The high-quality metal grease filters are dishwasher-safe and extremely durable.

Miele CleanCover

For protection and easy cleaning, the smooth surface conceals and prevents contact with electrical components and the motor.

**Exclusive
to Miele**

Active AirClean Filters

Odours are absorbed efficiently and neutralized completely in recirculation mode .

LED Dimmer Function

Environmentally friendly and long lasting. With up to 4.5 W, they provide uniform downlighting and produce a warm light tone.

Miele Ventilation Hood Product Highlights

Run-On Function

After cooking, the fan can be set to switch off automatically after a 5 or 15 minute run-on period, resulting in odour-free room air.

Filter Indicator

A red light lets you know when the grease and/or active charcoal filter is saturated to make filter replacement easy.

Design Flexibility

Clear design, intelligent technology- you can choose between many models and features.

Outstanding Workmanship

Unique characteristics of Miele hoods feature precise contours, precision joints and no unsightly gaps.

Safety Switch-Off

Sensible, even in case of operating errors, the ventilation hood will switch off automatically after 10 hours.

Single-Ply Safety Glass (ESG)

This glass, should it break, shatters into many small, blunt pieces for safety.

Optimized, Powerful Fan

Powerful and quiet high-quality radial fans with high air throughput and extraction are positioned on both sides.

Programmable Automatic Intensive Level Switch Off

Full power when required, the Intensive setting is efficient at extracting strong cooking vapours and odours.

Hood in Motion

The body of the ventilation hood automatically moves into the perfect position for ergonomic operation.

Product Assortment Overview

What is Miele ForeverCare?

Miele provides unique advantages to our customers with a combination of features unparalleled in the appliance category, namely:

Manufacturer-Direct Service

If you ever have a problem with your Miele machine, our own Miele Factory Service Technicians will take care of it. Most problems can be solved on the first visit, as we know the exact model you have and carry the genuine Miele parts you will need.

Extended Warranty from the Manufacturer

We want you to enjoy a long and trouble-free experience with our machines. In addition to the standard warranty, we have Miele Extended warranty. This direct offer from Miele allows you to increase your hassle-free coverage up to 10 years. The extended warranty relationship remains strictly with Miele, so you can deal directly and exclusively with us if you have any issues.

Miele Custom Plans

The chart below illustrates how you can upgrade the benefits of ForeverCare.

Manufacturer Delivery and Installation

We want your machine to work perfectly from the first time you use it. So, we offer delivery and installation in your home ourselves, with our Miele-dedicated service team. Installation can be organized within 48 hours of ordering through the Miele Customer Care Centre, and your delivery is tracked with GPS so we can provide you with a near exact time of delivery.

Miele CareCollection

To ensure you make the most of your Miele appliance, we've created a range of everyday and specialty products available for purchase. From laundry detergent to dishwasher tablets and a variety of cooking accessories, these products are designed specifically for your appliance, ensuring better results and a longer, hassle-free lifespan.
