The Perfect Temperature for Cookware and Food

Perfect Dining with Miele Warming Drawers

The success of a sophisticated meal depends on many factors: fresh and high-quality ingredients, careful preparation, a beautifully decorated table and careful thoughtful food presentation.

Preparing multiple courses while maintaining the quality of your prepared food is a challenge. Miele warming drawers offer a convenient solution and are the perfect complement to your Miele built-in appliances.

Perfectly Tailored to Meet Your Needs

Miele Warming Drawers

Miele offers warming drawers to keep not only cups and dishware warm, but also your food.

Plate and Cup Warming Drawers

Plates and cups can be conveniently stored in a warming drawer, as well as pre-heated for serving dishes and beverages at the perfect temperature.

Low Temperature Cooking

Low temperature cooking is a completely stress-free method for the user, as the process does not need to be monitored and the rest of the meal can be prepared without the pressure of time. Meat can be carved directly after cooking; relaxing time is not needed, because the juices are distributed evenly throughout the meat.

The Perfect Complement to Ovens and Coffee Systems

Additional Information

Miele Warming Drawers - Glossary

4 Operating Modes

Miele warming drawers feature four operating modes: pre-warming cups and plates, keeping food at serving temperature and for low temperature cooking. You simply select the mode you require via the flush touch control panel.

Capacity

Miele warming drawers offer ample space: depending on the model, they can accommodate dishware and serving platters for up to 12 people. Perfect when entertaining large parties.

CleanTouch Steel™

This innovative finish resists fingerprints, scratches and smudges. A special treatment stands up to aggressive handling – keeping the exterior of the warming drawer cleaner and easier to maintain.

Connection with Coffee Machine

If the warming drawer is connected to a coffee machine and you have programmed a switch-on time, then the warming drawer will automatically turn on 30 minutes before the coffee machine starts brewing. This ensures that pre-warmed cups and saucers are available for a perfect cup of coffee.

Cool-Touch Front

All surfaces on and around the warmer drawers remain cool. This ensures that controls, handles and adjacent cabinets stay cool to the touch. The design of the front ensures low temperatures on the outside, for a high degree of safety and protection against burns, particularly in terms of handleless appliances.

Full-Extension Drawer

Miele warming drawers can be pulled out completely for easy loading and unloading. Thanks to stable, telescopic runners, the full size warming drawers have a load capacity of up to 55 lbs.

Low Temperature Cooking

Low temperature cooking is commonly used in professional catering for achieving tender, aromatic and juicy results. The temperature control system of the Miele Warming Drawer enables you to enjoy professional results in your own home.

Movable Half-Rack Insert

A wire rack is supplied to provide a second level – delivering 30% more storage space.

Non-Slip Liner

The non-slip liner provides a secure base for your dishware and is removable for easy cleaning.

Perfect Serving Temperature

Temperature is individually selectable within the temperature range of the chosen mode to suit personal requirements and tastes.

Push-To-Open Mechanism

Miele handleless warming drawers align perfectly with featured built-in appliances. Thanks to the push-to-open mechanism, the drawers are easy to open by hand or, if you do not have a hand free when carrying dishware, with your elbow. The spring mechanism ensures that the drawer opens wide, making loading and operating easy.

Sabbath Mode

Miele's unique Sabbath mode allows individuals up to 72 hours of preprogrammed warming in a 30" warming drawer.

Safety Switch-Off

If the maximum operating time of 12 hours is exceeded, the warming drawer switches off automatically, so there's no need to worry if you forget to switch the appliance off by mistake.

Soft Close

Telescopic runners with self-closing feature offer gentle and quiet door closure. This ensures that dishware and food does not slide around, and therefore reduces the chance of spills.

Timer

Miele warming drawers feature a 4-hour timer. This allows you to enjoy your meal in peace or concentrate on other matters. The timer switches off automatically at the end of the set time.

Touch Controls

Miele warming drawers are operated via a flush touch control panel - offering convenient use and easy cleaning.
